The 18 speed transmission is strong, versatile and easy to use, once you get the hang of the pattern and if you are experienced with manual transmissions. It's not the easiest of transmissions if you are just starting to learn to drive a tractor trailer. If you are familiar with driving a manual transmission, you will probably find an 18-speed transmission to be a bit different, but still relatively simple in concept. You can still downshift and skip gears during acceleration if you are experienced and comfortable with the procedure, and if driving conditions permit.
