

Download Adominal Ultrasound Study Guide

Doris My symptoms were lack of appetite, loss of usual energy, difficulty breathing, very tender abdomen and what I thought was IBS. A nurse PA had done my yearly physical July 2007 and dismissed my suggestion of a colonoscopy because I had one two years previously. An umbilical hernia repair is a surgical procedure performed to fix a weakness in the abdominal wall or to close an opening near the umbilicus (navel) that has allowed abdominal contents to protrude.
