INSTALLING A DEFIBRILLATOR: TIPS FOR EMPLOYERS How much does it cost, and how many units should be installed? Automated external defibrillators (AEDs) have come down in price significantly over the past several years, said Terry Brown, Toronto-based president of SOS Emergency Response Technologies, a health and safety retailer that sells AEDS and other safety products. Our free online AED course is a great way to learn how to use an Automated External Defibrillator (AED). Below are the modules for this course. Simply work your way through the units and complete the end of

The Sudden Cardiac Arrest Foundation is a Non-Profit organization dedicated toward increasing awareness about sudden cardiac arrest. Join the SCA Community for SCA News, participate in the discussion forum, community blogs, share advice and gain insight. An Automated External Defibrillator (AED) is a portable electrical device used in the immediate treatment of a cardiac arrest. A defibrillator is a device which delivers an electrical shock to the heart. We will learn more about
