Sentinel lymph node mapping and staging in endometrial cancer: A Society of Gynecologic Oncology literature review with consensus recommendations
Cancer of the uterine cervix is largely a preventable disease that is characterized by a long lead time. Precancerous lesions gradually progress through recognizable stages before developing into invasive disease (as demonstrated in the images below).- Risk factors endometrial cancer -
Corpus uteri: Carcinoma and carcinosarcoma TNM, 8th edition - Uterine cancer survival RELATED TOPICS.
Patient education: Endometrial cancer diagnosis and staging (Beyond the Basics) Patient education:
Endometrial cancer treatment after surgery (Beyond the Basics)
Cervical lymph nodes are lymph nodes found in the neck. Of the 800 lymph nodes in the human body, 300 are in the neck. Cervical lymph nodes are subject to a number of different pathological conditions including tumours, infection and inflammation.
