

# Download Ccnp Switch Command Guide

Inter-VLAN Communication on a Multilayer Switch Through a Switch Virtual Interface. Rather than using an external router to provide inter-VLAN communication, a multilayer switch can perform the same task through the use of a switched virtual interface (SVI). CCNP Routing and Switching SWITCH 300-115 Official Cert Guide is a comprehensive self-study tool for preparing for the new SWITCH exam. Complete coverage of all exam topics as posted on the exam topic blueprint ensures readers will arrive at a thorough understanding of what they need to master to succeed on the exam. The book follows a logical organization of the SWITCH exam objectives. Can someone explain to me (in layman's terms) what the threshold command is used for when configuring IP SLA? I know there's a timeout command that will trigger some action once that time has elapsed (e.g. if it doesn't receive an ICMP echo reply within 1000 ms). hi can nebdy tell d the commands to assign static IP on a switch guess we do use Mac address here Keith a request plzz create a video on this o 14861
