

# Download Critical Educational Psychology

Educational psychology is the branch of psychology concerned with the scientific study of human learning. The study of learning processes, from both cognitive and behavioral perspectives, allows researchers to understand individual differences in intelligence, cognitive development, affect, motivation, self-regulation, and self-concept, as well as their role in learning. Links to major topics studied in educational psychology. Dr. William G. (Bill) Huitt Dept. of Psychology and Counseling Valdosta State University Educational psychology. Read about learning, recommended classroom practices, and surprising factors that can affect learning outcomes. Understand How Students Learn. Regent's Doctor of Education – Educational Psychology allows for a broad area of academic inquiry with topics like psychological underpinnings of learning, cognitive strategies for learning in children and adults, creating environments conducive to learning, brain research, teacher education, faculty roles; and professional development in varied settings.
