

Download Diagnostic Strategies For Common Medical Problems

Breast problems, such as breast lumps, breast pain or tenderness, nipple discharge or inversion, and changes in the skin of the breast, are common in women of all ages, from adolescents to older women. While it can be frightening to discover a new breast problem, most breast problems are not caused ...Current Psychiatry Vol. 9, No. 10 53 H allucinations in children are of grave concern to parents and clinicians, but aren't necessarily a symptom of mental illness. Exhaustion. Constantly feeling cold. Depression. Dry skin. Hair loss. Constipation. These vague symptoms may have a common cause: hypothyroidism, a common condition caused by a malfunctioning thyroid gland. People experiencing these symptoms may wonder what, if anything, is wrong with them. A CT (computed tomography) scan is a non-invasive medical test that uses x-rays to produce multiple images or pictures of the inside of the body and a computer to join them together in cross-sectional views of the area being studied.
