(H) Zoology course was introduced by the Faculty of Sciences from the academic year 2005-2006. The new course that will be effective from the academic year 2010-Introduction. Molecular genetic studies are continuously transforming our knowledge in biology and medicine. Forward and reverse genetics in cells and animal models is key to discovering causal mechanisms relating molecular events to phenotypes (Griffiths, 2012).Traditionally, genetic manipulations in mammalian species are often made in the germline of an organism, which can then be used to
