This 1988 Land Rover 110 is a right-hand drive example powered by a 3.5-liter V8 mated to a 5-speed manual gearbox. The truck has undergone exterior and interior refurbishment since being imported from the UK by the selling dealer two years ago, with the work reportedly including sandblasting, repair of dents and blemishes, and refinishing in... The Land Rover series I, II, and III (commonly referred to as series Land Rovers, to distinguish them from later models) are off-road vehicles produced by the British manufacturer Rover Company. The Land Rover was the first mass-produced civilian four-wheel drive car with doors on it. In 1992, Land Rover claimed that 70% of all the vehicles they had built were still in use. Land Rover and Range Rover specialist, supplying new and used genuine and aftermarket parts and accessories for all Land Rover vehicles established in 1970. Thanks Diana, from the blown-up picture in the manual it looks as though that part is internal to the booster? I am a bit doubtful though if that is the problem - it is not so much the feel of the pedal but that the vehicle really doesn't stop well, even considering the weight of a mortar carrier.
