Nursing interventions for pneumonia and care plan goals for patients with pneumonia include measures to assist in effective coughing, maintain a patent airway, decreasing viscosity and tenaciousness of secretions, and assist in suctioning. Nursing care planning goals for a client with hypertension includes adherence to the therapeutic regimen, lifestyle modifications, and prevention of complications are the focus of the nursing care for a patient with hypertension.. Hypertension is the term used to describe high blood pressure. Hypertension is repeatedly elevated blood pressure exceeding 140 over 90 mmHg. What is a nursing care plan? A nursing care plan is a plan of action for the care of a patient. In following the nursing process, after assessing and diagnosing a patient, the nursing care plan is created to take steps to meet the patient and health care team's goals for the patient's health. The nursing care plan includes any interventions the nurse will use to help the patient.
