The Bose Acoustimass 9 sub-woofer is included with the Acoustimass 6 and Acoustimass 10 home theater systems. These home theater systems are considered 5.1 speaker systems because they include five speaker channels plus one sub-woofer that connects to a surround sound receiver. However, that is not the case with the Onkyo. The way I would set it up (only because of the speakers you have) according to the Acoustimass Manual. You take the left and Right "Speaker" outputs to the Left and Right input on the Acoustimass and the speakers crossover does the rest.
