Simply plug the USB cable from your printer into an available USB port on your PC, and turn the printer on. Go to Start > Settings > Devices > Printers and Scanners. Look in Printers & Scanners to see if your printer is installed. If you don't see your device, select Add a printer or scanner. The Windows 98 driver is still on the inbox CD, and will work with Windows 98 if a HP printer driver has previously been installed successfully on the Windows 98 computer system via USB. The driver on the inbox CD can be installed now because the Microsoft files needed should already be on the computer system.
