From Mary Shelley's Frankenstein to current films like The Terminator about menacing androids I got a bit fooled by the idea of it being about machines and didn't realize how very literary-analysis this was going to be. And it focused much less on the actual fourth discontinuity than maybe would have been ideal - first we had to spend 4/5 of the book going through the first three. The Fourth Discontinuity: The Co-Evolution of Humans and Machines ... Bruce Mazlish discusses the complex relationship between humans and machines, pondering the implications of humans becoming more mechanical (our bodies increasingly hooked up to artificial parts), and of computer robots being programmed to think. Mazlish argues that just as ... THE FOURTH DISCONTINUITY: The Co-Evolution of Humans and Machines User Review - Kirkus. An often interesting and provocative—though sometimes obvious and, finally, unconvincing—historical exploration of humanity's relationship to machines.
