Tru Count Air Clutch and System Components Maintenance This document provides guidance on the general maintenance of the Tru Count Air Clutch® and other system components. General maintenance of air clutches . All Tru Count air clutches come from the factory pre-lubricated. The clutches do not need to be lubricated upon installation.Or, you can attach a Tru Count pneumatic clutch to each meter and create 3-row sections, 2-row sections, or single-row control. Even though the pneumatic Tru Count clutch utilizes pressurized air, the sectional-control module requires 12-volt power to regulate when each section must be “charged” with the air supply.Tru Count Air Clutches and LiquiBlock valves deliver superior performance for all your planting and spraying applications. They allow you to start and stop the flow of seed and fertilizer in real-time from the vehicle cab. With almost instant activation or deactivation, there is no lag time in your operation. Tru Count Air Clutches:It's a mechanical clutch TRU-COUNT ELECTRIC CLUTCHES : Tru Count offers planter shutoff clutches Allows for unrestricted manual steering when assisted : steering is not engaged: The Tru Count Air Clutch is part of an affordable system that controls individual row shutoff for any planter.
